

**EMERGENCY
REPORTING®**

The Most Trusted Fire & EMS Records Management Solution

The Administration Module

Efficiently Manage Your Team and Daily Operations

Keep your agency running smoothly with the Administration Module. Using this module, your agency can easily create, control, and maintain the master data and settings that integrate the Emergency Reporting system into your daily operations.

Use the Administration Module to:

- Customize the system to define Daily Log functionality, Apparatus, Master Street List, Stations, Shift/Rank structures and more
- Set permissions for user access
- Become agency friends with other ER customers
- Generate NFIRS, NEMSIS, billing and other data exports and submit them to the appropriate agencies

If you would like to contact a sales representative to learn more about how the Administration Module can help you better manage your agency, visit us here: <http://info.emergencyreporting.com/adminmodule>.
