

**Global Leader in Secure Cloud-based Fire
and EMS Records Management Services**

Emergency Reporting is a Trusted Provider to the Federal Government

Emergency Reporting (ER) is a powerful online system where authorized first responders access Fire & EMS reporting and records management services to enter incident reports, maintain resources, generate community risk assessments, store prefire plans and occupancy inspections and much more.

Emergency Reporting supports over 454,000 first responders with a powerful, cloud-based, secure, easy-to-use records management solution (RMS). Our federal packages offer several advantages for federal agencies including Microsoft Azure Government hosting.

Emergency Reporting federal customers within the Department of Defense, Department of Energy, and Department of Veterans Affairs (VA) are required to maintain compliance with stringent cybersecurity guidelines. To meet those guidelines the ER Federal Package, Ultra Secure Cloud, offers the following advantages:

- Security certifications for server hosting, including FedRAMP High level certifications, NIST 800.171 (DIB), ITAR, IRS 1075, DoD L4, and CJIS.
- Common Access Card (CAC) authentication for military servicemembers that require the highest level of security for user authentication.
- Risk Management Framework (RMF) compliance in process.
- NIST 140-2 compliant encryption to ensure data in transit is protected.

Emergency Reporting functions on the highly reputable and secure Microsoft Azure Government platform operating within isolated data centers and protected networks separated from general networks. The historical uptime of both Microsoft's Azure Platform and Emergency Reporting's Ultra Secure Cloud are greater than 99.9%.

Manage Your Agency Online with Emergency Reporting Federal Package Options

FIRE PACKAGE

- NFIRS Reports
- Administration
- Apparatus
- Calendar
- Daily Roster
- Fire Inspections
- Message Center
- Prefire Plans
- Inventory
- Hydrants
- Library
- Equipment
- Training
- Events
- Payroll
- Reports
- Shifts
- Demographics
- Response Analytics
- Safety Analytics Limited

FIRE & EMS

- NFIRS/NEMSIS Reports
- Administration
- Apparatus
- Calendar
- Daily Roster
- Fire Inspections
- Message Center
- Prefire Plans
- Inventory
- Hydrants
- Library
- Equipment
- Training
